**We offer an integrated  
approach to your  
energy needs**

# Who are Solargain?

Here at Solargain, we're proud to say we're one of Australia's leading solar power providers, with offices and warehouses countrywide. Having over 20 years of experience, we're regarded as one of the best structured and integrated solar power and solar hot water companies in the industry. We've also expanded to become one of Australia's largest and most trusted solar service companies.

## Our renewable solutions

Solargain integrates all aspects of energy-efficient technology to reduce your electricity consumption and save you money. We work with you to understand your individual needs and identify ways to improve your home's energy efficiency.

## What we do

Residential & Commercial Solar

Energy Storage Solutions

Solar Hot Water

Maintenance & Repairs

Customer Service & Support Centre

# Why choose Solargain?

## One of Australia's most experienced

At Solargain we're 100% Australian-owned, with offices nationwide. We have over 16 years of experience in solar PV and 72,000+ solar power and hot water systems installed as an organisation. We have unmatched industry experience and product knowledge.

## Our reviews speak for themselves

You'll find us on many popular independent review sites including Google, Trustpilot, ProductReview and SolarQuotes, offering unbiased customer feedback about our products and services. We also recently received Canstar Blue's award for most satisfied solar customers.

## Dedicated after-sales service department for all your questions

We offer the ultimate peace of mind that Solargain will be here for you now, and into the future. Top manufacturers choose to partner with us because of our heavy investment in customer service and the good reputation of our technical service department.

## Finance & payment options

We offer a variety of payment options to suit your needs. Speak to our team today about securing a loan to finance your renewable energy solution.

## Quality & Longevity Guarantee

We select the best products on the market for our installations and back them up with Solargain's Longevity Guarantee, one of the most comprehensive and long-lasting warranties in the industry.

## No deposits or lock-in contracts until installation

Unlike other solar companies, we don't take a deposit or down payment until your solar power system is delivered and installed.

## Reliability backed by accreditation

Solargain holds the strictest accreditation in the industry. We've been ISO 9001-certified since 2012 and only employ Clean Energy Council (CEC) accredited technicians.

# Why go solar?

Have you been weighing up whether to invest in solar power for a while now but still aren't fully convinced? We understand it's not a decision to be taken lightly. Yet, with compelling benefits like these, it really does make sense to switch to solar.

# 1

## **Save money on your bills**

Having the right solar power system on your roof can reduce or even eliminate your entire electricity bill. We work closely with you to assess your power needs, understand your budget and choose a solar power system that delivers maximum savings.

# 2

## **Create a sustainable future**

Installing solar panels on your roof is one of the easiest, most practical ways to contribute towards a sustainable future. A 5kw solar PV powered home will prevent 10.6 tonnes of carbon dioxide going into the atmosphere every year. That's equivalent to planting 592 trees annually!

# 3

## **Add value to your home**

A good quality solar power system on your roof adds instant desirability and value to your property.

# 4

## **Utilise government incentives**

There are still plenty of generous government incentives such as small-scale technology certificates (STCs) and feed-in tariffs which add up to thousands of dollars saved over the life of your system. We can help you make the most of these incentives.

# 5

## **Protect against rising energy prices**

As the cost of power continues to rise, the value of solar only improves. By installing a solar power system in your home, you will be producing free electricity, effectively shielding yourself from rising energy prices.

# Brands we use

## We've got you covered

We've been in the solar industry long enough to see out every policy change, every boom and every fall. In fact, we've been doing solar PV since the first systems were being installed in Australia.

Because of our longstanding reputation, we've been able to partner with some of the world's leading solar manufacturers. This means we can offer our customers extra benefits such as extended warranties and faster service. We're very proud of this, as it's proof of our commitment, reward for our customers and something very few organisations have achieved.

**We'll find the perfect  
fit for your home.**

### Excellent install

This is my second lot of panels. Easy install. Have had my original 17 panels for approx. 6 years. Working very well and my associations with Solargain have always been great.

### Outstanding service

Once the decision was made to go with Solargain we could not be happier. Their professionalism was second to none and took care of all install issues. Their installers were excellent and did an amazing job.

### Great service

Great service and product, very professional installation and advice...I would highly rate Solargain for anyone who is looking at adding solar to their house as we sat on the fence for ages contemplating.
