**We offer an
integrated approach
to your energy needs.**

Who is Solargain?

Solargain is one of Australia's leading solar power providers with offices and warehouses countrywide. Having been around for over 20 years, we are regarded as one of the best structured and integrated solar power and solar hot water companies in the business. Solargain has also expanded to become the largest and most trusted solar service company in Australia.

Solargain's Sustainable Energy Solutions

Solargain integrates all aspects of energy-efficient technology to reduce your electricity consumption and save you money. We work with you to understand your individual needs and identify ways to improve your home's energy efficiency.

Solargain has all of your energy needs covered

Residential & Commercial Solar Power

Customer Service & Support Hub

Why choose Solargain?

One of the nation's most experienced

Solargain is an Australian-owned company with offices nationwide. With over 12 years of experience in solar PV and 55,000 solar power and hot water systems installed as a group, we have unmatched industry experience and product knowledge.

Excellent customer reviews & track record

We are present on popular independent online review sites such as Trustpilot, ProductReview.com.au and SolarQuotes, offering unbiased customer feedback about our products and services.

Dedicated customer support Australia-wide

The ultimate peace of mind that Solargain will be here for you now and into the future. Top manufacturers choose to partner with us because of our heavy investment in customer service and the good reputation of our technical service department.

\$0 upfront, interest-free payment options

You can save while you pay off your system with our \$0 upfront options. This way, you pay nothing today and enjoy great solar savings in an instant.

Quality & Longevity Guarantee

We select the best products on the market for our installations and back them up with Solargain's Longevity Guarantee, one of the most comprehensive and long-lasting warranties in the industry.

No upfront costs, no deposits & no lock-in contracts

Unlike most other solar companies, Solargain takes no down payments or deposits until your solar power system is delivered and installed.

Reliability backed by accreditation

Solargain holds the strictest accreditation in the industry. Solargain has been ISO 9001-certified since February 2012 and only employs Clean Energy Council (CEC)-accredited electricians.

Australia's largest solar repairs & service network

With over 10 service technicians and 7 service agents, Solargain has the largest solar after-sales network in the country.

**Proudly 100%
Australian owned.**

**5 reasons to
choose solar.**

Why solar power makes sense

You've been weighing up whether to invest in solar power for a while now but still aren't fully convinced? We understand it's not a decision to be taken lightly. Yet, with compelling benefits like these, it really does make sense to switch to solar.

1

Save money on your bills

Having the right solar power system on your roof can reduce or even eliminate your entire electricity bill. We work closely with you to assess your power needs, understand your budget and choose a solar power system that delivers maximum savings.

2

Good for the environment

Installing solar panels on your roof is one of the easiest and most practical ways of contributing to a sustainable future. Even by installing a small 1 kW solar power system, you have the potential to save around 1.5 tonnes of carbon from being released into the atmosphere every year.

3

Add value to your home

As more Australians see the value of solar power, having a good quality solar power system on your roof adds instant desirability and value.

4

Utilise government incentives

There are still plenty of generous government incentives such as small-scale technology certificates (STCs) and feed-in tariffs which add up to thousands of dollars saved over the life of your system. We can help you make the most of these incentives to ensure you are saving as much money as possible.

5

Protection against rising energy prices

Unfortunately, the cost of power continues to rise. By installing a solar power system in your home, you will be producing free electricity, effectively shielding yourself from rising energy prices.

A tailored solution that's right for you

Designing a solar power solution to suit your household can be complex. We assess your roof, bills & budget to establish which of our three options fits your needs.

Value Range

Reputable brands at a good price

Planning to move out in a few years? Consider our value product range. This is a more cost-effective option, adding value to your home with a shorter payback period, allowing you to reap the benefits of solar while you are at the property, without breaking the bank.

Premium Range

High yields, year after year

Planning on living in your home for more than three years? We recommend you choose from our premium range of 'Tier 1' solar panels and European inverters. This will ensure you will continue to produce solar power well into the future, saving you more money in the long run. These systems produce more power, degrade less, are more reliable and have more comprehensive warranties – all of which are important in the long run.

Elite Range

The best that money can buy

No intention of moving house in the next five years or so? Perhaps you just demand the very best, or are considering batteries in the future. Consider our elite product range of European inverters, the best panels in the world and real-time energy monitoring. These systems offer an insight into your energy usage, are more efficient and are made from elite quality materials. With highly advanced technology backed by science, these products are designed to perform better in extreme heat and lower light. These systems don't pay for themselves straight away, but over the long term, their advantages are obvious.

**The perfect fit for
your household.**

Delivering uncompromised quality components

Just like shopping for any major electrical appliance, brand, quality, warranty period and future maintenance costs should be considered when buying solar power products. Every product in our carefully-curated range comes from independently-rated suppliers and meets strict quality criteria.

Australia's best Tier 1 panels

We only supply Tier 1 solar panels with consistently high yields in independent tests by CSIRO and Choice magazine.

The world's most reputable inverters

Our inverters are from the world's largest and most reputable manufacturers. We choose these high-quality systems because they are efficient, reliable, and come with a generous warranty.

State-of-the-art energy storage solutions

Instead of exporting your unused power back onto the grid, consider saving the power your solar panels produce to use at night. Become energy independent with our range of innovative lithium-ion modular battery systems or our revolutionary thermal energy storage solution.

The added advantage of quality solar hot water

You can unlock further savings by adding a solar hot water system to your solar package. This can help your family save as much as \$900 a year on water heating bills.

The safest isolators, racking, breakers & cabling

All installation components are important and shouldn't be overlooked. Solargain chooses its components in accordance with its audited selection processes. So you can have peace of mind that we never compromise your safety by using inferior products anywhere.

Our exclusive Longevity Guarantee

In the event you experience an issue with your solar power system and the product manufacturer is unavailable to assist you, Solargain's Longevity Guarantee means we will make good or find an equivalent replacement for your system within the original warranty period.

What our customers are saying.

“We are very pleased with our recent Solargain installation. Our sales representative was extremely helpful in providing information and pricing prior to the installation, and our installer was very friendly and efficient. All in all, the experience was seamless for us and we are very pleased with the result – especially the drastically reduced electricity bills! Well done to Solargain and thank you.”

Allison & Colin

“The team at Solargain has exceeded my expectations by a long margin. Great product. Great service. Great people. Solargain is the benchmark by which the industry should be measured.”

Blake Hansen

“I would like to compliment Solargain on my recent installation. I was very impressed with your great assistance when I made my initial enquiry, and my faith only grew as you responded to my subsequent enquiries and emails. Often in our modern society, customer service fails to reach the calibre of years gone by, but thankfully, your attitude took me back to 'the good old days'. It was a pleasure dealing with you. I am also most grateful to the boys for their installation and affable attitude. It has been an absolute pleasure dealing with Solargain.”
