We offer an integrated approach to your energy needs.

Who is Solargain?

Solargain is one of Australia's leading solar power providers with offices and warehouses countrywide. With over 25 years of experience, we're regarded as one of the best structured and integrated solar power and solar hot water companies in the business. Solargain has also expanded to become one of the largest and most trusted solar service companies in Australia.

Our renewable solutions

Solargain integrates all aspects of energy-efficient technology to reduce your electricity consumption and save you money. We work with you to understand your individual needs and identify ways to improve your home's energy efficiency.

What we do

Residential & Commercial Solar

Energy Storage Solutions

Solar Hot Water

Customer Service & Support Centre

Why choose Solargain?

One of the nation's most experienced

Solargain is an Australian-owned company with offices nationwide. With over 12 years of experience in solar PV and 70,000+ solar power and hot water systems installed as a group, we have unmatched industry experience and product knowledge.

Our reviews speak for themselves

We are present on popular independent online review sites such as Google, Trustpilot, ProductReview and SolarQuotes, offering unbiased customer feedback about our products and services.

Dedicated after-sales service department for all your questions

The ultimate peace of mind that Solargain will be here for you now and into the future. Top manufacturers choose to partner with us because of our heavy investment in customer service and the good reputation of our technical service department.

Finance & payment options

We offer a variety of payment options to suit your needs. Speak to our team today about securing a loan to finance your renewable energy solution.

Quality & Longevity Guarantee

We select the best products on the market for our installations and back them up with Solargain's Longevity Guarantee, one of the most comprehensive and long-lasting warranties in the industry.

No upfront costs, no deposits and no lock-in contracts

Unlike other solar companies, we don't take a deposit or down payment until your solar power system is delivered and installed.

Reliability backed by accreditation

Solargain holds the strictest accreditation in the industry. We've been ISO 9001-certified since 2012 and only employ Clean Energy Council (CEC) accredited electricians.

Why go solar?

You've been weighing up whether to invest in solar power for a while now but still aren't fully convinced? We understand it's not a decision to be taken lightly. Yet, with compelling benefits like these, it really does make sense to switch to solar.

1

Save money on your bills

Having the right solar power system on your roof can reduce or even eliminate your entire electricity bill. We work closely with you to assess your power needs, understand your budget and choose a solar power system that delivers maximum savings.

2

Create a sustainable future

Installing solar panels on your roof is one of the easiest, most practical ways of contributing to a sustainable future. Even by installing a small 1 kW solar power system, you have the potential to save around 1.5 tonnes of carbon from being released into the atmosphere every year.

3

Add value to your home

A good quality solar power system on your roof adds instant desirability and value to your property.

4

Utilise government incentives

There are still plenty of generous government incentives such as small-scale technology certificates (STCs) and feed-in tariffs which add up to thousands of dollars saved over the life of your system. We can help you make the most of these incentives.

5

Protect against rising energy prices

Unfortunately, the cost of power continues to rise. By installing a solar power system in your home, you will be producing free electricity, effectively shielding yourself from rising energy prices.

We've got you covered

We've been in the solar industry long enough to see out every policy change, every boom and every fall. In fact, we've been doing solar PV since the first systems were installed in Australia.

Because of our longstanding reputation, we've partnered with some of the world's leading solar manufacturers. This means we can offer our customers extra benefits such as extended warranties and faster service. We're very proud of this, as it's proof of our commitment, reward for our customers and something very few organisations have achieved.

**We'll find the perfect
fit for your home.**
